

# GENERAL PURPOSE + CEMENT

Lafarge General Purpose + Cement is a quality-assured BS EN 197-1 CEM II cement and carries the CE mark. It is produced using sustainable cement technology.

Lafarge General Purpose + Cement is a low carbon cement with excellent performance. Available in water and tear resistant 25kg plastic packaging for on site durability. Lafarge General Purpose + is fully compatible with all standard admixtures such as air-entraining agents, workability aids and waterproofers.

## FEATURES & BENEFITS

- ▶ Enhanced 32.5R strength class cement for better performance
- ▶ Sustainable cement technology containing limestone additions giving:
  - Less bleeding and segregation
  - Lower embodied CO2 than CEM I Portland cement
- ▶ Reduces wastage on site and improves sustainability
- ▶ Extended shelf life due to plastic packing compared to conventional paper packed cement

## APPLICATIONS

Ideal for all above-ground site applications, including:

- ▶ Mortars
- ▶ Renders
- ▶ Floor screeds
- ▶ Concreting
- ▶ DIY applications including bricklaying

Concreting

Bricklaying

Rendering

Floor screeding

weather resisting packaging

## AVAILABILITY

Available in 25kg plastic bags.

## STORAGE

This product must be stored in unopened bags clear of the ground. If stored correctly and used within 155 days of the packing date shown on this bag, the activity of the reducing agent\* will be maintained and this product will contain, when mixed with water, no more than 0.0002% (2 ppm) soluble chromium (VI) of the total dry weight of cement. Use of this product after the end of the declared storage period (see above) may increase the risk of an allergic reaction.

## MORTAR MIXES
